Summary:

I am a Junior Full Stack Software Developer with a passion for building practical software and web applications with an excellent user experience. With knowledge in Frontend and currently learning Backend Development, I am skilled in leading technologies such as HTML5, CSS3, Javascript, and Python. My background as a civil engineer has also helped me develop strong problem-solving abilities, which I effectively apply to software programming. My eagerness to learn new things will eventually position me at the forefront of IT professionals.

Education:

August 2022–Present

Diploma in Full Stack Software Development
Code Institute - Dublin, Ireland

September 2015–July 2016

Master of Engineering - MEng, Civil Engineering
Polytechnic University of Tirana - Tirana, Albania

September 2011–July 2014

Bachelor of Engineering - BE, Civil Engineering
Polytechnic University of Tirana - Tirana, Albania

Portfolio Projects:

- Portfolio:** A website showcasing my skills and projects to recruiters and potential employers. Built with HTML5, CSS3, Javascript, and Bootstrap framework.
View on [GitHub: https://github.com/Edmir-Demaj/portfolio-Edmir-Demaj](https://github.com/Edmir-Demaj/portfolio-Edmir-Demaj)
- Welcome to Albania:** A simple static website presenting nature and promoting Albania as a country. Built with HTML5 and CSS3 as well as used Figma to create wireframes.
View on [GitHub: https://github.com/Edmir-Demaj/welcome-to-albania](https://github.com/Edmir-Demaj/welcome-to-albania)
- Quiz Game:** A web application designed for users to test their knowledge with a variety of quiz questions. Built with HTML5, CSS3, and Javascript.
View on [GitHub: https://github.com/Edmir-Demaj/quiz-game](https://github.com/Edmir-Demaj/quiz-game)
- Quality of Life Index:** A command line web app providing users with the QLI for different countries in the world. Built with Python and some Python libraries.
